UPCOMING EVENTS

- SWE and SPHE: Mocktails Events
  - 3/12, 5-8 PM, USF Alumni Center, Business Casual

- ALL EVENTS AFTER SPRING BREAK CANCELLED UNTIL FURTHER NOTICE

ORG SHOWCASE

USF’s Engineering EXPO has been teaching K-12 students about STEM for 48 years. EXPO 2020 was no different with 61 exhibitors present, including USF STEM organization exhibits from USF students, to teach the attendees about chemical reactions, physics, electronics, and more! This year roughly 15,000 attendees showed up on Friday and Saturday to experience this one of a kind event. Engineering EXPO is made possible by the EXPO E-Board (pictured below) who dedicates their time to ensuring that the long-standing event goes off without a hitch.

Nominate your org or another for the org showcase by emailing us at engecouncil@usf.edu
waste heat using nanotechnology. He received his PhD from USF in Chemical Engineering, but his research areas included quantum tunneling, condensed matter physics, self-assembled organic mono-layers, and polymer chemistry. He traveled to various states and performed in a variety of venues.

Bio: Dr. Celestin is the Senior Research Engineer for the College of Engineering at the University of South Florida. Michael chose USF to further his education as he enrolled in Chemical Engineering and later expanded into a Chemistry coursework set as well. After graduating and working for the Department of Environmental Protection, he decided to further his education and co-enrolled in a masters program. Celestin continued onto his doctorate which aspired to improve the efficiency of photovoltaics by recovering

March is Women’s history month!

The USF College of Engineering currently includes 1614 females in enrollment. This correlates to 23% of the college.

E-COUNCIL UPDATES

- E-Council Elections Info
  Session: March 25th 6:30-9:30 PM, ENC 1002
- E-Council Elections: April 1st

CHANGES TO COME DUE TO CORONAVIRUS
