^{RR} Indicates a registered report. This is a format where the research questions and methodology undergo peer review prior to data collection. At that stage the manuscript is provisionally accepted. After data collection, the full manuscript then undergoes another peer review and is published if the pre-registered protocol is followed (see <https://cos.io/rr/>). When a Stage 2 Registered Report is under review, it is listed as IPA-under review to reflect that the article has already been accepted in principle, and the journal where the registered report has been accepted is shown.
