

BURIED BODY WORKSHOP

January 24-28, 2022 (40 credit hrs), \$650

IFAAS & USF FORT

(Facility for Outdoor Research & Training)

To Register: <https://forensics.catalog.instructure.com/>
Contact: Erin Kimmerle (kimmerle@usf.edu) or Liotta Dowdy (liottan@usf.edu)

The Florida Institute for Forensic Anthropology & Applied Science presents an advanced workshop for forensic anthropologists, law enforcement, crime scene investigators, death investigators, & medical examiners on how to locate and excavate clandestine burials.

This is an advanced course with hands-on field training, including the excavation of burials & staged outdoor crime scenes using human cadavers from the USF Human Donation program located at the USF/IFAAS FORT (Facility for Outdoor Research & Training).

Participants will learn:

- How to locate clandestine burials using remote sensing and forensic archaeology, such as ground penetrating radar, historic imaging, GIS mapping, drones.
- How to excavate buried bodies, using donated human cadavers for individual burials & staged homicides.
- Best practices for documentation of outdoor crime scenes through traditional low budget methods (scene sketching) & technology driven methods (3D scanning and GIS methods).
