Next Scheduled Subcommittee Meeting: Workshop, November 14th at USF St. Petersburg

NOTES
Student Success, Academic Programs & Campus Identity Subcommittee
October 18, 2018

Present: Mike Griffin, Chair; Rick Piccolo, Dr. Tonjua Williams

I. Call to Order

Chair Griffin called the meeting to order and thanked everyone for attending.

Dr. Martin Tadlock welcomed the Task Force subcommittee and audience members to USF St. Petersburg.

Senator Brandes provided introductory comments about USF St. Petersburg and the community's investment in its success, noting for consolidation to succeed, all of the campuses must move forward.

II. New Business – Action Items

The September 19, 2018 meeting were approved.

III. New Business – Information Items

a. Introduction

b. Testimony

• Workforce Demand

Ms. Kyle Barr, Senior Vice President of Team Resources Officer, Bay Care Health System, began her presentation by noting Bay Care is the second largest employer in the region. Because of size and scope Bay Care generates \$4 Billion in revenue and has an economic impact of \$7 billion. Bay Care is a not-for-profit community-owned organization that provides health care to underserved and uninsured patients. Recognized as a top 65 place to work by Forbes Magazine, Bay Care has been committed for years to growth and education of the community. It has a long partnership with USF training residents and fellows.

She said over 160,000 people work in healthcare jobs in the area and there are more than 6,500 job openings at any given time. There will be more than 60,000 openings over the next five years. There is a high demand for nurse assistants, RNs, and medical clinical assistants.

Ms. Barr stressed that university partnerships are key. Bay Care trains USF Medical Residents and Fellows at Morton B Plant Hospital. Bay Care has an earn-as-you-learn

Advanced Technical Certificates with Hillsborough Community College. Bay Care also has an RN program with St Petersburg College.

She noted the following regional workforce shortages: lab techs, clinical and advanced nurses, medical records coder, primary care physicians, psychiatry and psychologists. Ms. Barr said that she hears from her team that they need to stack their education to afford it and continue to work. She closed by reiterating the biggest needs for the hospital system: nursing, lab sciences and primary care and psychiatry physicians.

There were questions from the subcommittee members regarding stackable credentials and partnerships in the Sarasota-Manatee region.

Kristi Hoskinson, Training and Development Lead, FCCI Insurance said that the insurance industry is aging and at risk of losing institutional memory over the next several years. A major challenge is how to fill the talent and skills gap that comes with the aging workforce.

Ms. Hoskinson highlighted FCCI's outstanding partnership with USF Sarasota-Manatee, noting they have hired 39 USF graduates in the last five years. She also explained various partnerships FCCI employees have with USFSM such as serving on college advisory committees.

FCCI has a goal to expose students to how exciting the insurance industry is and she recommended that recent graduates who are currently in the industry serve as recruiters. Benefits of insurance careers include multiple disciplines, opportunities for continuing education, competitive income, and career growth.

There was discussion regarding FCCI's number of employees and locations across the country.

- **Developing the Research Capacity**

Dr. Paul Sanberg, Senior Vice President for Research, Innovation & Knowledge Enterprise, USF System, began his presentation noting that USF Research and Innovation is proud to be a USF System Office, partnering with all three USF campuses. They serve the USF community in three main ways:

- Management of grants and contracts
- Technology transfer and commercialization
- Office of Corporate Partnerships

USF ranks 5th nationally in the number of patents issued. He also highlighted the new Office of Corporate Partnership, which creates a single entry point for industry partnerships for all three USF campuses.

Dr. Sanberg provided an overview of the USF Research Strategic Plan, noting that it is the first of its kind among state universities in Florida. He also noted all three USF campuses

participated in the development of the plan. He explained that nearly half of the Preeminence metrics are related to research. Research expenditures are weighted towards USF Tampa, but there is important research happening on all three campuses, with consolidation providing an opportunity to expand research across the university. Over time, the combined achievements will bring a unified USF closer to AAU membership. The achievements in research commercialization show USF's impact on the world; USF ranks 5th among public institutions in generating new patents. Dr. Sanberg noted some critical challenges however, including infrastructure and resources.

There were questions asked regarding research dollars at regional campuses and how the Research Office manages grants. Dr. Sanberg noted opportunities for growth in grants at USF St. Petersburg and USF Sarasota-Manatee. He also noted the significant infrastructure in place to aid with faculty research, including helping faculty apply for grants and complying with audits.

There was further discussion regarding proactively seeking and asking faculty to apply for grants as well as the resources and facilities needed for research. Additionally, there were questions regarding additional resources that will need to be provided to expand research across the three USF campuses.

Chair Griffin said that the subcommittee's expectation is that additional research capacity is developed at across all campuses.

Dr. Paul Kirchman, Dean of the College of Science & Mathematics, Co-Chair of the Consolidation Implementation Committee (CIC) Research Committee and Dr. Bob Dechenes, Associate Dean, College of Medicine Molecular Medicine, Co-Chair of the Consolidation Implementation Committee Research Committee, USF Health, provided a presentation regarding the research capacity of a consolidation USF, noting that a key focus of universities is research. The System Research Plan was referenced and the six focus areas of research outlined within it: Brain and Spinal Cord, Data Science, Heart, Human Security, Research Translations and Water.

While the Preeminence metrics for research have been met, USF must continually push forward towards AAU membership and other goals, while maintaining a focus on improving Preeminence metrics. Many of the other Preeminence metrics are also related to research, including public university ranking and retention/graduation rates.

Drs. Kirchman and Dechenes highlighted their work as the CIC Research Committee co-chairs, noting the committee started out by collecting a lot of data on the current state including research centers of excellence and infrastructure.

Dr. Dechenes outlined several *DRAFT* considerations from the CIC Research committee. The considerations are still in progress, pending other decisions and further discussion. Considerations included supporting the growth of regional campus research initiatives and strengths as well as joint appointments for USFSM and USFSP faculty. Additionally, a database was suggested that an online database be created that includes the resources and

centers that are available to all faculty, as well as the implementation of state of the art video-teleconferencing capabilities.

Dr. Kirchman stressed that the information presented is preliminary considerations from the CIC and has not yet been fully vetted.

There was discussion from the subcommittee members regarding opportunities for increased master's and doctoral programs at USF St. Petersburg and USF Sarasota-Manatee.

- **Shaping Unique Campus Identities in the Context of Consolidation**
 - Dr. Ralph Wilcox, Provost and Executive Vice President, USF System
 - Dr. Martin Tadlock, Regional Chancellor, USF St. Petersburg
 - Dr. Karen Holbrook, Regional Chancellor, USF Sarasota-Manatee

Chair Griffin asked that each of the three leaders discuss how to maintain the unique identity of his/her campus as well as the strategic vision for each campus today and what should it look like in the future.

Dr. Wilcox began by noting that while USF Tampa is the oldest of the three campuses, it is still a young organization. USF Tampa is one of 115 public doctoral universities with the highest level of research activity, which is measured not by structure, but by the array of degrees we deliver, the weight of the research portfolio, and by the profile and success of students.

With consolidation, the expectation is that the one university will retain its classification as a high research activity university. The research powerhouse that the campus has become is built on the six research pillars already outlined. He said that he had yet to talk to a faculty member that thought they had enough space, infrastructure and resources to achieve their goals. He pledged that the university would continue to meet the needs of students, faculty, staff and the community.

Provost Wilcox explained that the consolidation process is guided by the BOT Guiding Principles and the SACSCOC guidance.

Provost Wilcox shared that it may be ill advised to start programs without knowing what the specific demands or resources are. If there is a proven demand for doctoral programs they will be delivered, noting the flexibility with existing degree programs and the locations they can be offered.

Dr. Tadlock shared steps taken over the past three years to position USFSP as a research intensive campus. There are faculty who have high levels of research activity with heavy teaching loads.

Research efforts at USFSP have been expanded through deliberate hiring of faculty from R1 Institutions, specifically, faculty hired in the last two years have come from or received doctorates from high research universities. The number of awards in the last five years has increased from 13 to 30. USFSP added new science labs that are spectacular, innovative and cutting edge; invested \$500, 000 in research facilities; and doubled staff (from one to two people) dedicated to supporting research; USFSP also put together a research advisory committee to identify research opportunities and mentor junior faculty.

Dr. Tadlock shared that preeminence metrics are USFSP's largest opportunity for success but noted the current numbers are not where they should be and are unacceptable. USFSP is dedicated to student success and has had a 9% increase in retention and 7% increase in the four-year graduation rate. This fall, 93% of students admitted had USFSP listed as a first or second university choice. Two years ago, that percentage was 60%. Dr. Tadlock said that the best way to improve retention is to increase program offerings.

The USF System Master Academic Plan created before the consolidation effort began outlines new programs that could be offered at USFSP. Dr. Tadlock highlighted that USFSP is in the middle of the Innovation District and the campus should be the research corridor for the entire region. Finally, he noted USFSP is partnering with USF Tampa and USFSM to deliver programs in the areas of insurance, management, hospitality, and more.

Dr. Tadlock concluded his remarks by saying local decision making has to stay at USFSP; the campus cannot be dictated or mandated in everything because their work centers on relations with the community.

Dr. Holbrook described the unique identity of USFSM, noting it is a very small non-residential campus, which meets the higher education needs of a very diverse population. 85% of the students work and over 50% of those work more than 30 hours a week. Due to the size of USFSM, faculty know the students by name and can provide a personalized education. USFSM's agility and local decision-making authority allows for the delivery of programs to be tailored to the local community needs.

While the Sarasota area is a great arts community, USFSM doesn't have arts programming. Degree programs are already highly interdisciplinary (e.g. aging matches with Science and Business programs) and USFSM is thinking about how further develop existing programs. She explained the need for resources for research and space to grow. USFSM needs to build cohorts of faculty to apply for grants but also need resources to apply.

There were questions from the subcommittee regarding the current processes to add degree programs across at a system level. Provost Wilcox noted that all USF campuses coordinate planning for academic programming, because the programs are approved through the BOT and BOG. Academic planning must take duplicate programs from other state universities into consideration.

There was discussion regarding academic decision-making authority. Provost Wilcox noted the delivery of programs would be made with significant input from the communities USF

serves. As of July 1, 2020, “one” USF must break down this notion of “your” students and think of “our” students. USFSM and USFSP have been very innovative in the programs they have implemented and the focus should be on meeting the needs of our students, not on the structure of the institution.

Mr. Piccolo asked for a better understanding of what Preeminence would bring to regional campuses and clarity around the difference between the decision making with separate accreditations and single accreditation.

Chair Griffin explained that there are still several meetings left and they will be designed as workshops to flesh out final recommendations.

The subcommittee members asked Drs. Wilcox, Tadlock and Holbrook what each of their campus strengths are.

Dr. Tadlock said USFSP is committed to research and innovation, and its existing opportunities around life sciences and marine sciences. He noted that sustainability ties into those opportunities, as well as bio-medicine. New degree programs on the Master Academic Plan follow this trend. Additionally, he noted that STEM is important to teaching and Arts and Sciences program will connect with this major emphasis. Finally, he noted USFSP should be all things Red Tide, Blue Green Algae.

Dr. Holbrook said USFSM is very proud of its business programs. She said that through the consolidation process USFSM will not lose programs but can only gain additional programs post-consolidation. Dr. Holbrook explained how to build a T Shaped Student and that cross-disciplinary areas or interdisciplinary degrees are where USFSM could focus.

Provost Wilcox highlighted that no campus will be shutting down any programs, though a system-wide review is conducted regularly in terms of student inactivity. USF leads the state in types of degrees awarded in STEM – 66% of students. USF Tampa wants to extend those programs and are exploring a digital ecosystem. Provost Wilcox also discussed Centers of Excellence that could be leveraged across the three campuses.

• **Student Success in the Context of Consolidation - Postponed**

- Dr. Paul Dosal, Vice President for Student Affairs and Student Success, USF Tampa
- Dr. Patti Helton, Regional Vice Chancellor for Student Affairs, USF St. Petersburg
- Dr. Brett Kemker, Regional Vice Chancellor for Academic and Student Affairs, USF Sarasota-Manatee

Chair Griffin asked the Student Success representatives from the three campuses to postpone their presentation until the Nov. 6th subcommittee meeting.

c. Public Comment

Craig Sher, executive chair of the Sembler Company, said that in real estate development, there has been a flight of professionals. The core professionals are aging out

and new people are not coming in. There are a few programs at UF and FSU, however it will be important to bring talent back to the Tampa Bay area. He closed by noting USFSP does not offer any programs in real estate and there are dozens of real estate professions who would be willing to mentor and hire graduates.

Robert Kapusta, Managing Partner at FisherSauls, Director at the Warehouse Arts District Association, and the American Arts and Crafts Museum, Board of Duncan McClellan's non-profit, chair of Bill Edwards Foundation of the Arts, said that the arts are part and parcel of St. Petersburg and recommended that a school or college of the arts be created at USFSP.

Chris Steinocher, President and CEO of the St. Petersburg Chamber of Commerce, noted he was still unsure what the focus areas of the KTCOB be and the College of Arts and Sciences will be in the future. He explained that the details are very important and there are several conversations that still need to be had.

d. Discussion

Chair Griffin highlighted the three legislative focus areas for the committee:

1. Identification of specific degrees in programs of strategic significance, including health care, science, technology, engineering, mathematics, and other program priorities to be offered at the University of South Florida St. Petersburg and the University of South Florida Sarasota/Manatee and the timeline for the development and delivery of programs on each campus;
2. Maintaining the unique identity of each campus and an assessment of whether a separate educational mission is beneficial to the future of each campus;
3. Developing the research capacity at each campus.

Dr. Williams said that this Task Force expects to add resources to all three USF campuses.

IV. Adjournment

Adjourned at 4:20pm

UNIFIED RESPONSE TO QUESTIONS FROM THE STUDENT SUCCESS,
ACADEMIC PROGRAMS, AND CAMPUS IDENTITY SUBCOMMITTEE

NOVEMBER 5, 2018

STUDENT SUCCESS/ACADEMIC PROGRAMS/CAMPUS IDENTITY SUBCOMMITTEE

Membership:

Michael "Mike" Griffin, Chair; Frederick "Rick" Piccolo; and, Dr. Tonjua Williams.
Staff Liaison: Paige Beles-Geers

Committee Focus Areas:

- a. Identification of specific degrees in programs of strategic significance, including health care, science, technology, engineering, mathematics, and other program priorities to be offered at the University of South Florida St. Petersburg and the University of South Florida Sarasota/Manatee and the timeline for the development and delivery of programs on each campus;
- b. Maintaining the unique identity of each campus and an assessment of whether a separate educational mission is beneficial to the future of each campus;
- c. Developing the research capacity at each campus; and
- d. Other subject matters pertaining to campus strengths as determined by the Chair of the Task Force that would support the work of the Task Force.

Recommendations due to Task Force November 29, 2018

Responses to members' questions are provided by:

Ralph C. Wilcox, PhD
Provost & Executive Vice President
University of South Florida

Martin Tadlock, PhD
Regional Chancellor
USF St. Petersburg

Karen A. Holbrook, PhD
Regional Chancellor
USF Sarasota-Manatee

With support from the USF System Office of Decision Support and the Office of the Provost.

QUESTIONS:

1. *Do you have any recommended proposed changes to your ~~college-and~~ course offerings that address item a. for your campus that can be accomplished under your existing budget? If yes, how does this address the unique needs of the community as put forth in the public testimony? What would be the timeline to deliver these programs under your proposal?*

Please refer to Attachment (1) for details on course offerings and identification of areas of strategic emphasis for newly proposed programs to address the unique community needs. It is important to point out that most, if not all, expanded degree offerings (outside, the USF System 5-year New Degree Master Plan) will require additional investments in preeminent-level faculty [annual new faculty count by campus], space and equipment in advance of USF Consolidation in the 2020-21 academic year. Such investments will be essential to academic quality assurance at the level of a Preeminent State Research University, supporting Student Success (student retention and timely degree completion), and enhancing research productivity. A summary of expanded degree offerings by year, by campus, and by level follows:

Year 0 (2019-20):

USF Tampa (6)

- Bioengineering and Biomedical Engineering, Baccalaureate [5-year New Degree Master Plan – New to USF]
- Informatics, Doctorate [5-year New Degree Master Plan – New to USF]
- Cybersecurity & Information Assurance, Baccalaureate [5-year New Degree Master Plan – New to USF]
- Logistics & Supply Chain Management, Baccalaureate [5-year New Degree Master Plan – New to USF]
- Logistics & Supply Chain Management, Masters [5-year New Degree Master Plan – New to USF]
- Financial Planning & Services, Baccalaureate [5-year New Degree Master Plan – New to USF]

USF St. Petersburg (2)

- Sustainability Studies, Baccalaureate [5-year New Degree Master Plan – New to USF]
- Environmental Chemistry, Baccalaureate [5-year New Degree Master Plan – New to USF]

USF Sarasota-Manatee (1)

- Cybersecurity & Information Assurance, Baccalaureate (2+2)

Year 1 (2020-21):

USF Tampa Campus (4)

- Design, Baccalaureate [5-year New Degree Master Plan – New to USF]
- Marriage & Family Therapy/Counseling, Masters [5-year New Degree Master Plan – New to USF]
- Occupational Therapy, Doctorate [5-year New Degree Master Plan – New to USF]
- Management Science, Masters [5-year New Degree Master Plan – New to USF]

USF St. Petersburg Campus (17) [33 new faculty]

- Computer & Information Sciences, Baccalaureate [2]
- Curriculum & Instruction, Doctorate [1]
- Elementary Education & Teaching, Baccalaureate [2]
- Secondary Education & Teaching, Masters [5-year New Degree Master Plan – New to USF]
- Civil Engineering, Baccalaureate [3]
- Electrical Engineering, Baccalaureate [3]
- Mechanical Engineering, Baccalaureate [3]
- General Studies, Baccalaureate
- Biomedical Sciences, Baccalaureate [3]
- Oceanography, Masters (currently delivered by the USF Tampa College of Marine Science)
- Oceanography, Doctorate (currently delivered by the USF Tampa College of Marine Science) [2]
- Fine/Studio Arts, Baccalaureate [2]
- Public Health, Baccalaureate [3]
- Nursing, Baccalaureate [3]
- Hospitality Management, Baccalaureate [3]
- Management Science, Baccalaureate [5-year New Degree Master Plan – New to USF] [1]
- Risk Management & Insurance, Baccalaureate [2]

USF Sarasota-Manatee Campus (18) [31 new faculty]

- Natural Resources Management & Policy, Baccalaureate [5-year New Degree Master Plan – New to USF]
- Computer & Information Sciences, Baccalaureate [2]
- Information Science, Masters [1]
- Curriculum & Instruction, Doctorate [2]
- Chemical Engineering, Baccalaureate [2]
- Civil Engineering, Baccalaureate [2]
- Electrical Engineering, Baccalaureate [2]

- Mechanical Engineering, Baccalaureate [2]
- Industrial Engineering, Baccalaureate [2]
- Biology, Masters [1]
- Biomedical Sciences, Baccalaureate [2]
- International/Global Studies, Baccalaureate [5-year New Degree Master Plan – New to USF]
- Chemistry, Baccalaureate [2]
- Healthcare Administration, Masters [2]
- Public Health, Baccalaureate [3]
- Nursing, Baccalaureate [3]
- Entrepreneurship, Baccalaureate [2]
- Management Science, Baccalaureate [5-year New Degree Master Plan – New to USF] [1]

Year 2 (2021-22):

USF Tampa Campus (4) [3 new faculty]

- Digital Communication & Media, Doctoral [5-year New Degree Master Plan – New to USF]
- Applied Mathematics, Masters [5-year New Degree Master Plan – New to USF]
- Financial Planning, Masters [5-year New Degree Master Plan – New to USF]
- Hospitality Management, Baccalaureate [3]

USF St. Petersburg Campus (6) [9 new faculty]

- Mathematics Teacher Education, Baccalaureate [1]
- Science Teacher Education, Baccalaureate [1]
- Social Work, Baccalaureate [2]
- Audiology & Speech Pathology, Baccalaureate [3]
- Nursing, Masters [1]
- Financial Planning, Baccalaureate [1]

USF Sarasota-Manatee Campus (12) [17 new faculty]

- Speech Communication & Rhetoric, Baccalaureate [1]
- Learning Design & Technology, Masters [2]
- Mathematics Teacher Education, Baccalaureate [1]
- Science Teacher Education, Baccalaureate [2]
- Social Science Teacher Education, Baccalaureate [1]
- Psychology, Masters [1]
- Social Work, Baccalaureate [2]
- Health Sciences, Baccalaureate [2]
- Audiology & Speech Pathology, Masters [1]
- Nursing, Masters [1]
- Financial Planning, Baccalaureate [1]
- Management Information Systems, Baccalaureate [2]

Year 3 (2022-23): [New faculty investments will be calculated for Year 3 beginning in 2020-21]

USF Tampa Campus (2)

- Graphic Design, Baccalaureate
- Risk Management & Insurance, Baccalaureate

USF St. Petersburg Campus (5)

- Architecture, Masters
- Learning Design & Technology, Masters
- Sustainability Studies, Masters
- Public Health, Masters
- Nursing Practice, Doctorate

USF Sarasota-Manatee Campus (6)

- Food Science, Baccalaureate [5-year New Degree Master Plan – New to USF]
- Environmental Science, Baccalaureate
- Architecture, Masters
- Special Education & Teaching, Baccalaureate
- Public Health, Masters
- Nursing Practice, Doctorate

Year 4 (2023-24): [New faculty investments for Year 4 will be calculated beginning in 2021-22]

USF Tampa Campus (2)

- Orthotics & Prosthetics, Masters [5-year New Degree Master Plan – New to USF]
- Entrepreneurship, Baccalaureate

USF St. Petersburg Campus (1)

- Financial Planning, Masters

USF Sarasota-Manatee Campus (1)

- Financial Planning, Masters

Please note:

This summary does not include the 47 institution-based degree programs currently delivered online that, beginning in Year 1 (2020-21), will be available to all students admitted to USF, regardless of home campus. Please see Attachments (1) and (2) for online programs.

It is important to point out that while the proposed expansion of degree offerings (in years 0-4), especially at USF St. Petersburg and USF Sarasota-Manatee, addresses stated needs in the community, implementation of the plan will demand considerable due diligence beginning in Spring 2019 to verify:

- Documented community need, commitment, and support (including philanthropic investments, internship placements, research support, and hiring of graduates, etc.),
- Demonstrable and sufficient student demand(at the specific campus location),
- Alignment with the Board of Governors' programs of strategic emphasis (high need, high skilled, high paid),
- The availability and adequacy of new resources consistent with a preeminent state research university (faculty, space, financial aid),
- Academic quality assurance consistent with SACSCOC and specialized accreditation,
- Consideration of the mode of delivery (including the identification of degrees delivered fully online),
- Thoughtful partnership with Florida State Colleges (to ensure non-duplication of baccalaureate degree programs unless a compelling reason exists, and optimization of USF's *FUSE* transfer and articulation program),
- Critical and continuing review of recent enrollment patterns and degree productivity, and
- Implementation of the current *USF System New Degree 5-year Master Plan*.

Furthermore, the proposed degree expansion plan does not include completely new degree programs presented in the earlier Huron Report (e.g., Aeronautical Engineering)

USF Tampa:

USF Tampa is working to meet community needs, and student demand with a special focus on strengthening the economy through workforce development, experiential education, and high impact practices that align with business and industry sector needs across Tampa Bay. USF Tampa seeks to deploy resources in support for the Florida Board of Governors' Areas of Strategic Emphasis. Complementary areas of research growth focus on addressing the most pressing issues of Florida and the nation as defined by the Florida Board of Governors including: health and wellness, opioids, mental health and disabilities, childhood development, marine and coastal, cybersecurity, technology and data, translational research, human-technology interface (artificial intelligence, autonomous vehicles), and space exploration and commercialization.

USF St Petersburg:

USF St. Petersburg has programs in place that address workforce needs in Florida and have been identified as needed in the Tampa Bay Region. Proposed new programs are on the USF System Master Academic Plan along with the timeline for approvals. All new programs must include a needs analysis and a plan for implementation.

USF Sarasota-Manatee:

Public Testimony at USF Sarasota-Manatee clearly emphasized the value of existing partnerships between the University and the local colleges by means of the Cross College Alliance (SCF, Ringling College of Art and Design, FSU Ringling and New College of Florida) as well as businesses, schools,

and not-for-profit organizations. USF S-M is the area’s comprehensive four-year and graduate degree-offering university with the ability to customize our educational offerings by collaborating directly with local businesses. We have designed a curriculum that provides the credentials for traditional degrees, but because of our size and agility and local decision-making authority, we can transition faster to developing programs that meet the evolving needs of regional businesses and the students who will enter the workforce in our area – one of the nation’s fastest growing.

It has been stated that “the future of work is the future of education” and that “work is intrinsically collaborative and interdisciplinary” – not conducted in silos. Employers require more workers who can bridge the gap between disciplines, and learn so-called “unnatural combination” skills.¹ We believe in this future, and our proposal for USF S-M after consolidation is designed around this precept. It is one that also coincides with the BOG’s statement that “universities are expected to work with local industries and employers to identify academic programs needed to support local or regional economic development and workforce needs.”

New Faculty Investment Needs to Support Degree Expansion at USF T, USF SP, and USF S-M:

Based upon discipline and rank (OSU R1 +10%):

A. To launch Proposed New Degree Expansion in Year 1 (2020-21)

	# of new faculty	\$ salary & benefits (recurring)	\$ startup (non-recurring)
USF Tampa:	0	\$0	\$0
USF St. Petersburg:	33	\$4.38 M	\$9.64 M
USF Sarasota-Manatee:	31	\$4.35 M	\$10.54 M
TOTAL =	64	\$8.73 M	\$20.18 M

Librarian, Research Technician, and Administrative Staff are calculated at 1:6 new faculty = 10 positions at \$80,000 salary + benefits = **\$0.80 M recurring** + \$5,000 office setup = **\$50 K non-recurring**

GRAND TOTAL for Year 1 = \$9.53 recurring (personnel) + \$20.19 M non-recurring (startup for preeminent research faculty and support personnel)

B. To launch Proposed New Degree Expansion in Year 2 (2021-22)

# of faculty	\$ salary & benefits (recurring)	\$ startup (non-recurring)
--------------	-------------------------------------	-------------------------------

¹ The Future of Work: How Colleges Can Prepare Students for the Jobs Ahead, *The Chronicle of Higher Education*, 2017, p. 16.

USF Tampa:	3	\$0.39 M	\$0.30 M
USF St. Petersburg:	9	\$1.20 M	\$0.32 M
USF Sarasota-Manatee:	17	\$2.29 M	\$0.73 M
TOTAL =	29	\$3.88 M	\$1.35 M

Librarian, Research Technician, and Administrative Staff are calculated at 1:6 new faculty = 5 positions at \$80,000 salary + benefits = **\$0.40 M recurring** + \$5,000 office setup = **\$25 K non-recurring**

GRAND TOTAL for Year 2 = \$ 4.28 M recurring (personnel) + \$1.38M non-recurring (startup for preeminent research faculty and support personnel)

C. Future Proposed Degree Expansion Investments (2022-24) will be calculated at a later date.

2. *If yes to a. how does this enhance the unique identity of your campus? Are there any separate educational missions unique to your campus that are beneficial to the future of your campus? Do they require new funding?*
-

Consistent with SACSCOC accreditation guidelines, there can only be **one mission within a singularly-accredited university**. Each unit may contribute to the mission in different ways such as:

USF Tampa:

USF Tampa is a comprehensive preeminent state research university, defined by research output, academic program array, along with an unparalleled commitment to student access for success.

In summary, we see USF's Tampa campus as:

- An international research powerhouse with a focus on positive impact, improving the human condition, and economic growth, with particular strengths in health and life sciences, and engineering,
- An attractive destination for the best and brightest students and most talented professors from around the world,
- A diverse learning community dedicated to student success delivered through a comprehensive, rigorous and relevant curriculum, built within a digital ecosystem,
- A welcoming and globally engaged campus with academic, cultural and athletic opportunities,
- A strong partner with the communities we serve: in Tampa Bay, across the State of Florida, around the nation, and throughout the world, and
- Building a complementary networked identity in collaboration with colleagues on our campuses in St. Petersburg and Sarasota-Manatee.

USF St. Petersburg:

With the opening of the new STEM, INQ lab in Coquina Hall and the move to align curriculum in teacher preparation with STEM principles, the USF SP College of Education is positioned to be the state leader in preparing all future teachers for implementation of STEM in the classroom regardless of grade level or discipline taught. The unique baccalaureate degree offered in the USF SP College of Education is different from any of the USF System education degrees. The undergraduate degree is a Bachelor of Science in Education, approved and accredited by the state and prepares program graduates for certification and endorsement in 4 areas: Elementary Education, Exceptional Student Education, Reading Endorsement and ESOL Endorsement. No other program graduates education candidates with those credentials within the 120 credit hour requirement. The program could be a state model for undergraduate education degrees.

Early discussions in the USF SP Kate Tiedemann College of Business about “Blue” business with the College of Marine Sciences and “Green Business” with the USF SP College of Arts and Sciences have occurred. Both would be interdisciplinary, and both reflect one of the core identities of USF SP, Environmental Sustainability. Both would need core faculty to complement existing faculty.

The two new distinct BS degrees in Sustainability Studies and in Environmental Chemistry, in the USF SP College of Arts and Sciences, will further support the unique identity of USF SP as a campus invested in the environment and sustainability. The new distinct BS degree in Computational and Applied Mathematics lays the groundwork for hosting degree programs in Computer Science and Engineering—both of which will require funding to set up teaching laboratories.

The new hosted second degree Nursing BSN will further support USF SP's commitment to the health sector in St. Petersburg and Pinellas County. We already supply graduates with laboratory science degrees in Biology, Health Science, Environmental Science, and in Fall 2019 Environmental Chemistry—all of whom have skills to contribute to the health sector.

USF Sarasota-Manatee:

The programs that exist currently are very much aligned with the needs of the community and region and the partnerships that have been established with the other area universities as well as the local businesses. There are many examples of how the advisory boards for three of the four colleges help address the needs of the community and develop a relevant curriculum.

3. *What impediments exist to developing research capacity at your campus?*

USF Tampa:

Sustaining the campus' competitive position as a Preeminent State Research University and any future growth in the campus' research portfolio and productivity is severely hampered by (a) limited faculty resources (and salaries that are not competitive with national aspirational peers), (b) inadequate research laboratory space, (c) paucity of state-of-the-art research instrumentation (including research computing), and (d) insufficient financial aid for graduate students.

USF St. Petersburg:

Research and teaching lab space and funds to equip space. Research start-up funds for research faculty.

Access to Doctoral Students: While many of our faculty have published in top-level journals, the propensity in which they can publish in these journals is impacted by two factors. First, the higher teaching load (5 courses a year). Second, not participating in the doctoral program limits access to doctoral students who serve as great support in research activities for our faculty.

Graduate Assistants: The lack of graduate assistants support has a similar impact on our faculty productivity.

USF Sarasota-Manatee:

The absence of the following are impediments. We have the following needs to increase research productivity and become more competitive for grants – especially federal grants:

- A STEM building, defined as the Integrated Science and Technology Complex (ISTC) (on the PECO list) and relevant equipment and technology to serve research and teaching needs.
- Temporary space during construction of the ISTC building (see below).
- Doctoral programs and graduate assistants.
- Appropriate faculty positions – increase in the percentage of the tenure-track and tenured faculty. We have a faculty hiring strategy that will change a less-than-stable faculty into a stable faculty. This is essential for research productivity – and the ability to obtain grants.
- Equity in teaching and service work assignments across the new USF.
- Start-up funds for new faculty in tenure-track positions.
- Internal funding for existing faculty to seed research initiatives that will pave the way for obtaining external awards.
- Formalized relationships across USF to accelerate USF S-M scholarship.
- A residence hall and student center.

4. *What one thing would be the most beneficial assistance to enhance the research capacity at your location?*

USF Tampa:

Without a critical mass of (I) research intensive faculty, USF cannot compete head-to-head with similar colleges/departments at AAU institutions and other aspirational peers. For example, Chemistry has 27 tenured/tenure track and 39 total faculty (the Public AAU average is 42.5/51.4) – along with (II) additional support for world class graduate students, (III) state-of-the-art research facilities on USF’s current 5-year Capital Improvement Plan: (a) Engineering Research Building (\$150 M), and (b) STEM Research/Interdisciplinary Research Building (\$72.6 M), and (IV) instrumentation.

USF St. Petersburg:

The development of additional research and teaching labs through re-designing existing and/or acquisition of new space. For the Kate Tiedemann College of Business, access to doctoral students and graduate assistants.

USF Sarasota-Manatee:

USF Sarasota-Manatee must have a building for research and education. We have designed the Integrated Science and Technology Complex (\$44.5 M) to accommodate several programs in the sciences, information technology, some non-STEM programs, professional training space, business development and research space, and community-accessible spaces (etc.).

5. *Regarding identification of specific degrees: In St. Petersburg, the community college also confers baccalaureate degrees that were approved by USF and provides a University Partnership Center that was developed to address the community need for master's and doctoral degrees in Pinellas County. There does not seem to have been much research beyond the City of St. Petersburg regarding bachelor, masters, or doctoral program needs. The need is there. Overlooking this component could have huge implications for program offerings and growth opportunities at USF SP as well as USF S-M. What else needs to be done regarding the identification of new programs and the location of current program offerings? What impact does program offerings/ location have on faculty, staff, and administrators as programs ownership shifts?*

Please refer to the collective response to Question 1 and see Attachments (1), (2), and (3) for proposed degree expansion, considerations, online degree programs delivered by USF Tampa, USF St. Petersburg, and USF Sarasota-Manatee, the USF System 5-year New Degree Master Plan, and a data response regarding the Florida State College System Baccalaureate degree programs and productivity.

USF Tampa:

Research on market needs will be conducted to verify community and student demand across the greater Tampa Bay region as part of the planning and implementation stage, beginning in Spring 2019.

USF St. Petersburg:

We need to revise and implement the existing USF System 5-Year Master Academic Plan. Programs on the plan have been carefully researched as to demand locally, regionally, and statewide. Also, programs on the plan have been carefully evaluated in terms of programmatic offerings already available in the State University System to avoid unnecessary duplication.

USF Sarasota-Manatee:

Several new programs have been identified as feasible to deliver on the USF S-M campus. These have been assigned to come on board by each of 5 years in the future – assuming there are appropriate new financial resources that would allow for faculty hires.

Careful consideration will be given to utilizing instructional (and research) space in the University Partnership Center, as well as other sites across the region, in order to accommodate the proposed expansion of academic program delivery.

6. *Campus Identity: Campus branding and meeting the needs of the entire community is what makes the institution premier. I have not heard of a plan or strategy to maintain or strengthen the campus identity for USFSP/USFSM/USFT and ~~the~~ USF ~~System~~ as a whole in any of the discussions. What are your plans to maintain the individual campus identity? What changes if any, are you planning to make to ensure that each campus maintains its own identity while developing the ~~system~~ identity of USF – A singularly-accredited university? Please share the status of the assessment of the educational mission - separate or unified? What are the recommendations regarding the educational mission?*
-

The matter of campus branding will be addressed by the External Affairs Sub-Committee of the Consolidation Implementation Committee. Specific strategies related to strengthening individual campus identities, within a unified mission of one university, will be addressed as part of the USF branding initiative. As a Carnegie classified *Doctoral University with Highest Research Activity*, and a Florida designated *Preeminent State Research University*, USF's singular Mission will rest on three pillars:

- Student Access for Success,
- Research, Innovation, and Economic Development, and
- Partnership for mutual benefit and impact.

USF Tampa:

“We define ourselves not by a name, date, or city, but by the impact we have on the world.”

USF Tampa may be the oldest of the three campuses, yet we are, by no means, rooted in tradition like other preeminent universities and most AAU institutions. Rather, we are defined by our **bold ambition, innovation, and creativity, agility, freshness, and vigor.**

1. **We are a global research powerhouse**, with a balance between basic and high impact translational research activity, and focused on interdisciplinary convergence – “building bridges and not silos” –well-positioned to serve the State of Florida’s needs in finding innovative solutions to complex problems:

Healthy Florida:

- Health and wellness [USF = Brain & spinal cord; Heart health]
- Opioids
- Mental health and disabilities
- Childhood development

Secure Florida:

- Marine and coastal [USF = Water]
- Cybersecurity, technology, and data [USF = Human security; Data science]

Prosperous Florida:

- Translational research [USF = Research translation]

- Human-technology interface (artificial intelligence, autonomous vehicles)
 - Space exploration and commercialization
2. **We are a national model for student success**, providing access for success to students from diverse socioeconomic, first generation, racial and ethnic, and national backgrounds. USF Tampa has a proud record of (a) attracting the “best and brightest” students from across Florida and around the world, (b) retention (91.3%), 4-yr (60.4%), and 6-yr (73.1%) graduation rates with elimination of the completion gap, (c) students earning competitive national fellowships (e.g. Fulbright, Gilman, Goldwater, Marshall, Peace Corps., etc.), and (d) placement in the top postgraduate and professional programs in the world.
 3. **We provide a vibrant living, learning, exploring, and working community** on campus. With living and learning communities in support of a rigorous, relevant, and engaged learning environment.
 4. **We cherish our mutually beneficial partnerships with business, industry, and public sector agencies in the community**, and we are committed to building a complementary networked identity in collaboration with colleagues on our campuses in St. Petersburg and Sarasota-Manatee.
 5. **We are shaping a digital ecosystem to support success in all we do.**

USF St. Petersburg:

We offer learning and living opportunities dramatically different from the other USF campuses. Our small size, downtown waterfront location, and unique identity draw students from all over the region. We are recognized for our close connection to the City of St. Petersburg and to key stakeholders in Pinellas County. The campus is an anchor to the Innovation District and to Downtown St. Petersburg. USF SP has an active and growing research portfolio. The preeminence and performance based metrics where USF SP has the largest potential impact are retention and 4-year graduation rates.

USF Sarasota-Manatee:

Student success is a high priority for the USF S-M campus. USF S-M has research-experienced and productive faculty, but much is needed to solidify the research culture. We know how to generate new knowledge and effectively communicate such to our students and how to approach complex problem solving through our research. Success in obtaining competitive research grants, especially federal grants, is contingent upon the availability of appropriate resources.

7. *Research Capacity: What is the impact on faculty who have not been involved in research?*

USF Tampa:

Professional development and mentoring, along with equity of assignment, equity of support, and equity of scholarly/scientific/creative performance assessment will be essential across all campuses within a consolidated USF. USF Tampa has already adopted a differentiated faculty staffing model with an appropriate balance of tenured and tenure-earning research faculty and non-tenure earning instructors, consistent with a Carnegie classified Doctoral University: Highest Research Activity (n=115).

USF St. Petersburg:

Faculty who have primarily been involved in teaching and service will need support to move to intensive research assignments. Support includes those things listed in other sections of this document, i.e., graduate assistants, research and teaching lab space, load adjustments, etc.

The Kate Tiedemann College of Business is AACSB Accredited. The professional accreditation requires us to maintain certain faculty qualification standards consistent with the mission. As a comprehensive regional university, our current faculty standards (requirements for publication and intellectual contributions by faculty) are consistent with this mission. The majority (over 90%) of our faculty meet these standards. With a shift to a R1 University, our standards will need changes to remain consistent with the Muma College of Business.

USF Sarasota-Manatee:

Virtually all faculty at USF SM have research capability. Both past and prospective research accomplishments are criteria used in new hires of faculty (other than adjunct). The level of research expected at an R1 institution would be difficult to achieve at USF SM due to the lack of research resources (start-up funding and facilities and equipment for the STEM fields) and the amount of teaching that is expected on our campus. Some faculty who devote the majority of their professional effort to teaching may prefer to enter a non-tenure-earning teaching track where research is not expected.

8. *How and where do you see your respective campuses making greater contributions to strengthen preeminence designation and the path to achieve AAU?*
-

Consistent, Preeminent levels of Student Success (Freshman Retention and 4-yr/6-yr Graduation rates) will be essential across all campuses in the first instance. Focused research investment and productivity will follow.

Association of American Universities (AAU) performance metrics are:

Phase I Indicators

1. Competitively funded federal research support,
2. Membership in the National Academies (NAS, NAE, IOM),
3. Faculty awards, fellowships, and memberships,
4. Citations,

Phase II Indicators

5. USDA, state, and industrial research funding,
6. Doctoral education,
7. Number of postdoctoral appointees, and
8. Undergraduate education.

USF Tampa:

Research investments – Total Expenditures (\$568 M), Federal Research Expenditures (\$254 M), Postdoctoral Fellows (281)

Research Outputs – Doctorates (721), NAMs (13), Citation Impact (1.66), Patents (120)/ Licenses (122), Startups (10)

USF Tampa is home to 13 members of the National Academies. USF Faculty Awards, Fellowships, and Members – 101 Highly Prestigious Awards (2017)

Top 50 national and global rankings (U.S. publics): *Times Higher Education World University Rankings* (#38); *Kiplinger Best College Value* (#39); *Academic Ranking of World Universities* (#41); and *Center for Measuring University Performance* (#26-50).

USF Tampa's most recent Freshman Retention Rate is 91.3%; 4-year Graduation Rate is 60.4%, and 6-year Graduation Rate is 73.1%

USF St. Petersburg:

All colleges have high research faculty members and research clusters that, with additional research time and space, will further contribute to USF's research profile. Clusters: Child advocacy and health, Florida studies, Environmental Sustainability, Oceanography, Finance, Entrepreneurship, Innovation and STEM Education, Digital Journalism and Media Studies, Graphic Arts.

“AAU universities across the United States aim to continually advance society through education, research, and discovery.” With consolidation, the Kate Tiedemann School of Business will focus on calling the disciplines of “Finance” and “Entrepreneurship” home on the USF St. Petersburg Campus. Our contribution to strengthen preeminence and develop a path to achieve AAU will be focused on three strategies:

1. Raise the research of the faculty – create a supportive environment for faculty to achieve performance to meet preeminence standards.
2. Student Performance – Strengthen student support services to achieve high-level of retention and graduation in a timely manner.
3. Community Engagement and Innovation – continue to develop partnerships with the business and general community to generate public-private partnerships that enhance our academic offerings and also to create a meaningful and sustainable economic impact in our communities. Innovation will be key to driving this economic impact.

USF Sarasota-Manatee:

USFSM needs to continue to advance student success – especially graduation rates. Retention rates are improving and only slightly below the USF benchmark. They are likely to meet the benchmark this year and progress to exceed it. We need to enact the faculty hiring strategy that will allow for greater research success in grants and publications.

9. *What are your faculty to student ratios? If the ratio is lower than our benchmark institutions, what are your plans to increase enrollment while achieving greater levels of student success?*

The average Student-to-Faculty (S2F) ratio at the 34 public AAU universities is 17:1 (Fall 2016). The University of Florida (AAU) was at 20:1 in 2016 prior to launching an extensive investment in additional faculty positions last year. This year, the USF System is at 21:1.

While it is possible that both USF St. Petersburg (18:1) and USF Sarasota-Manatee (12:1) have capacity, smaller campuses do not realize the same economies as larger institutions. Any enrollment growth must first be carefully managed to ensure significant gains in retention and graduation rates.

Student to Faculty Ratio		Fall 2017	Fall 2018	Δ
USF System		21.4	21.0	0.4
USF Tampa		22.3	22.1	0.2

University of South Florida Consolidation Academic Program Planning Data Three Year Rolling Averages for Enrollment and Degrees Awarded Annually

Legend:
Blue = Program in development as per Five-Year Master Academic Plan
Green = Program on the Five-Year Master Academic Plan
Orange = New program
Light Gray = Undergraduate program currently offered on more than one campus
Light Yellow = Graduate program currently offered on more than one USF campus
✓ = Term the program is anticipated to be offered
✓ = Ph.D. program that USFSP and/or USFSM wish to offer
FUSE = The FUSE program is an enhanced transfer agreement between the USF System and 8 Florida College System partners
* = Fully Online Program
Degree Level Legend: B-Bachelors; M-Masters; S-Specialist; P-Professional Doctorate; R-Research Doctorate

Expanding Access to SUCCESS at USF

Dr. Paul Dosal, *Vice President - Student Affairs & Student Success, Tampa*

Dr. Patti Helton, *Regional Vice Chancellor - Student Affairs, USFSP*

Dr. Brett Kemker, *Regional Vice Chancellor, Academic and Student Affairs, USFSM*

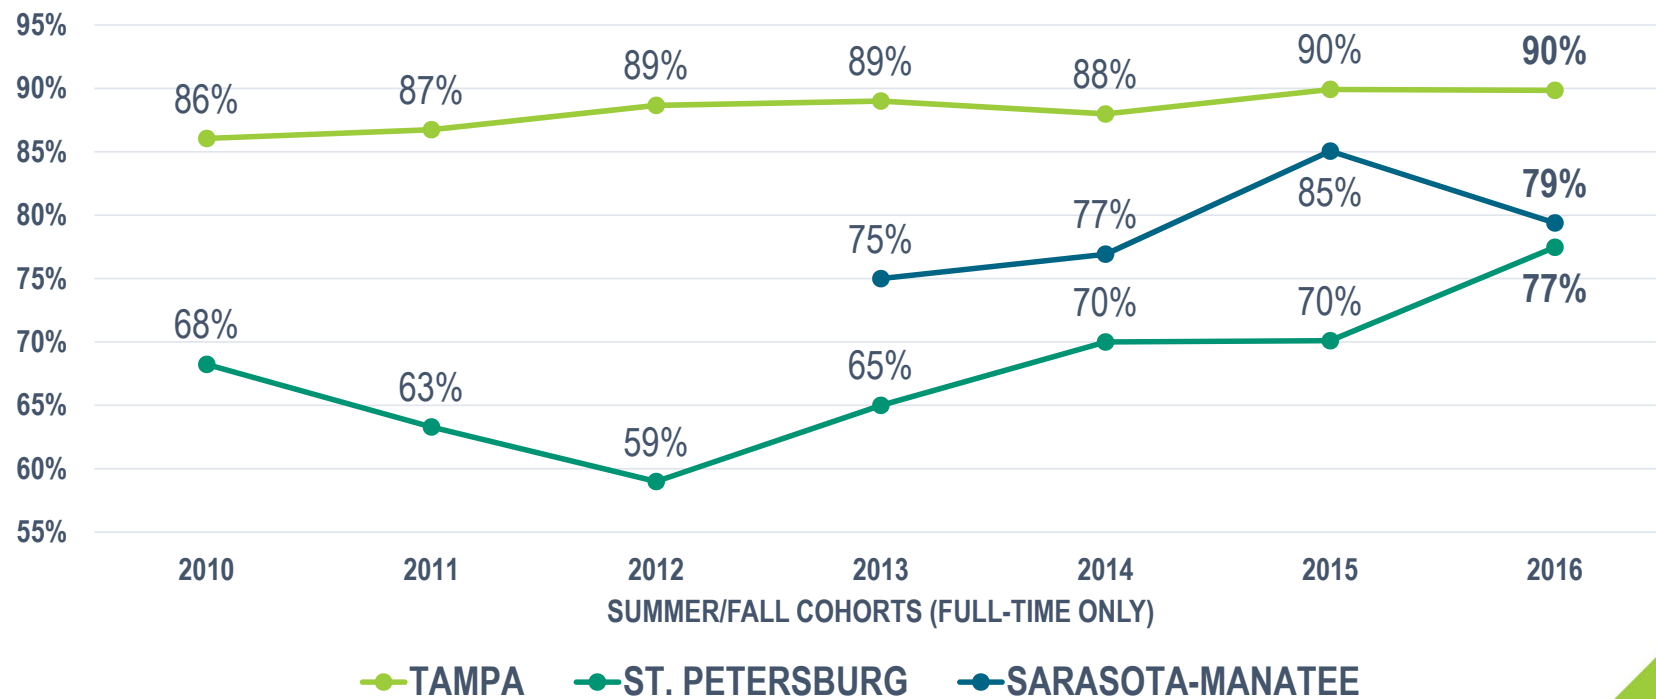

October 18, 2018

Snapshot of Three Campuses

	TAMPA	ST. PETERSBURG	SARASOTA-MANATEE
Undergraduate Enrollment*	31,389	4,102	1,842
% Identified as Non-White	52.9%	38%	33%
% Pell	40%	41%	41%
% Residential	20%	15%	N.A.
Retention Rate (2016 cohort)	90%	77%	79%
4-Year Grad Rate (2013 cohort)	60%	30% 41% (swirl)	35% 46% (swirl)

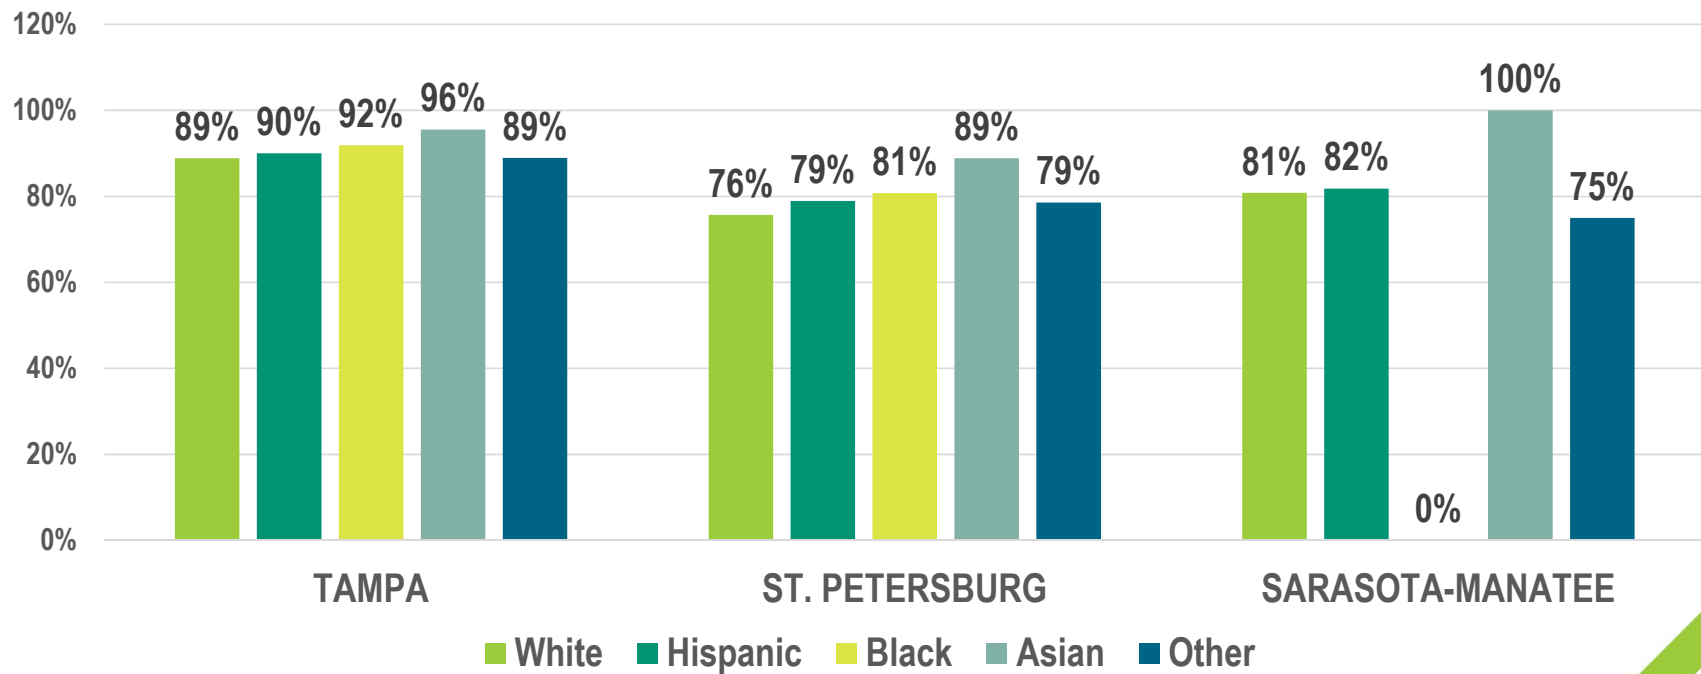

FTIC Retention Rate

By Campus

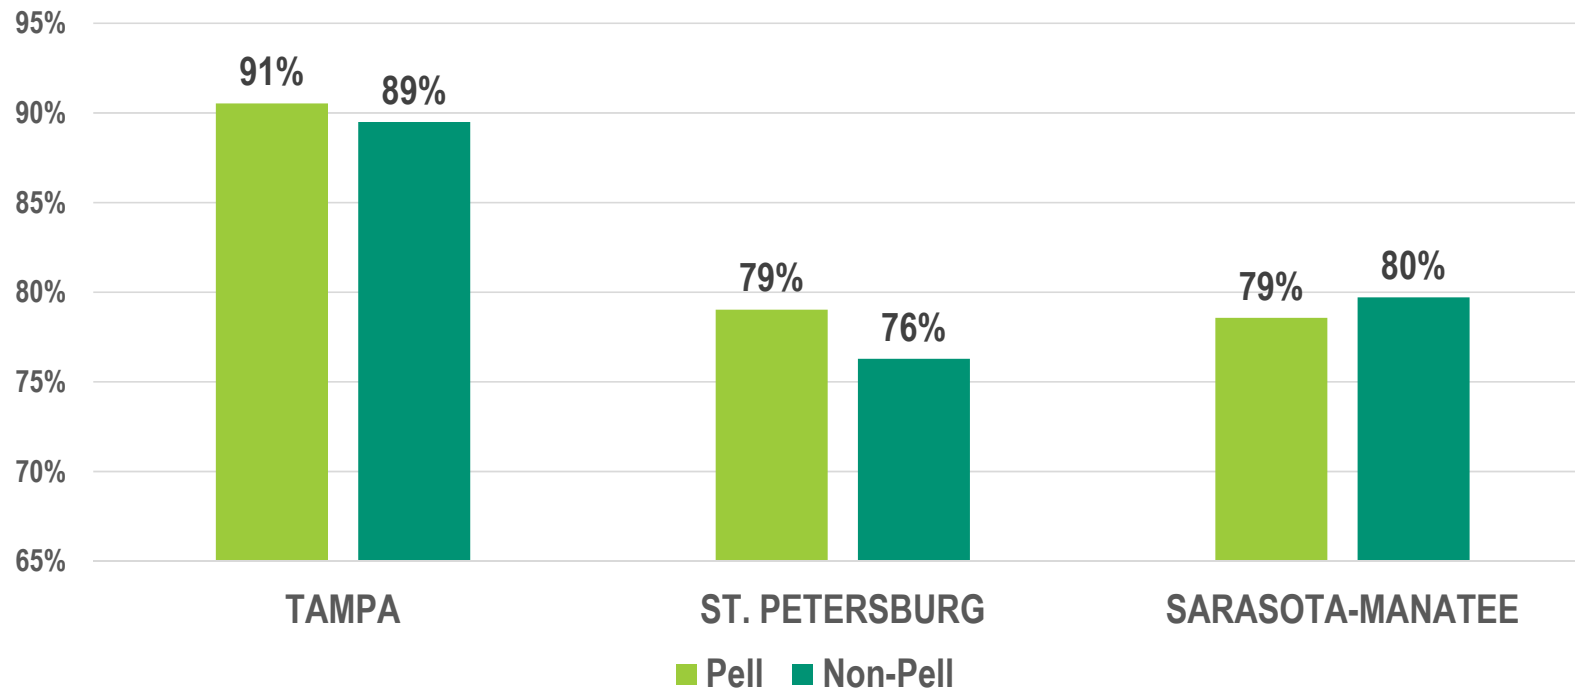

FTIC Retention Rate: Race & Ethnicity

By Campus, 2016-2017 Summer/Fall Cohort (Full-Time Only)

FTIC Retention Rate: Pell vs. Non-Pell

By Campus, 2016-2017 (Full-Time Only)

Academic Progress Rate

By Campus, With Swirl

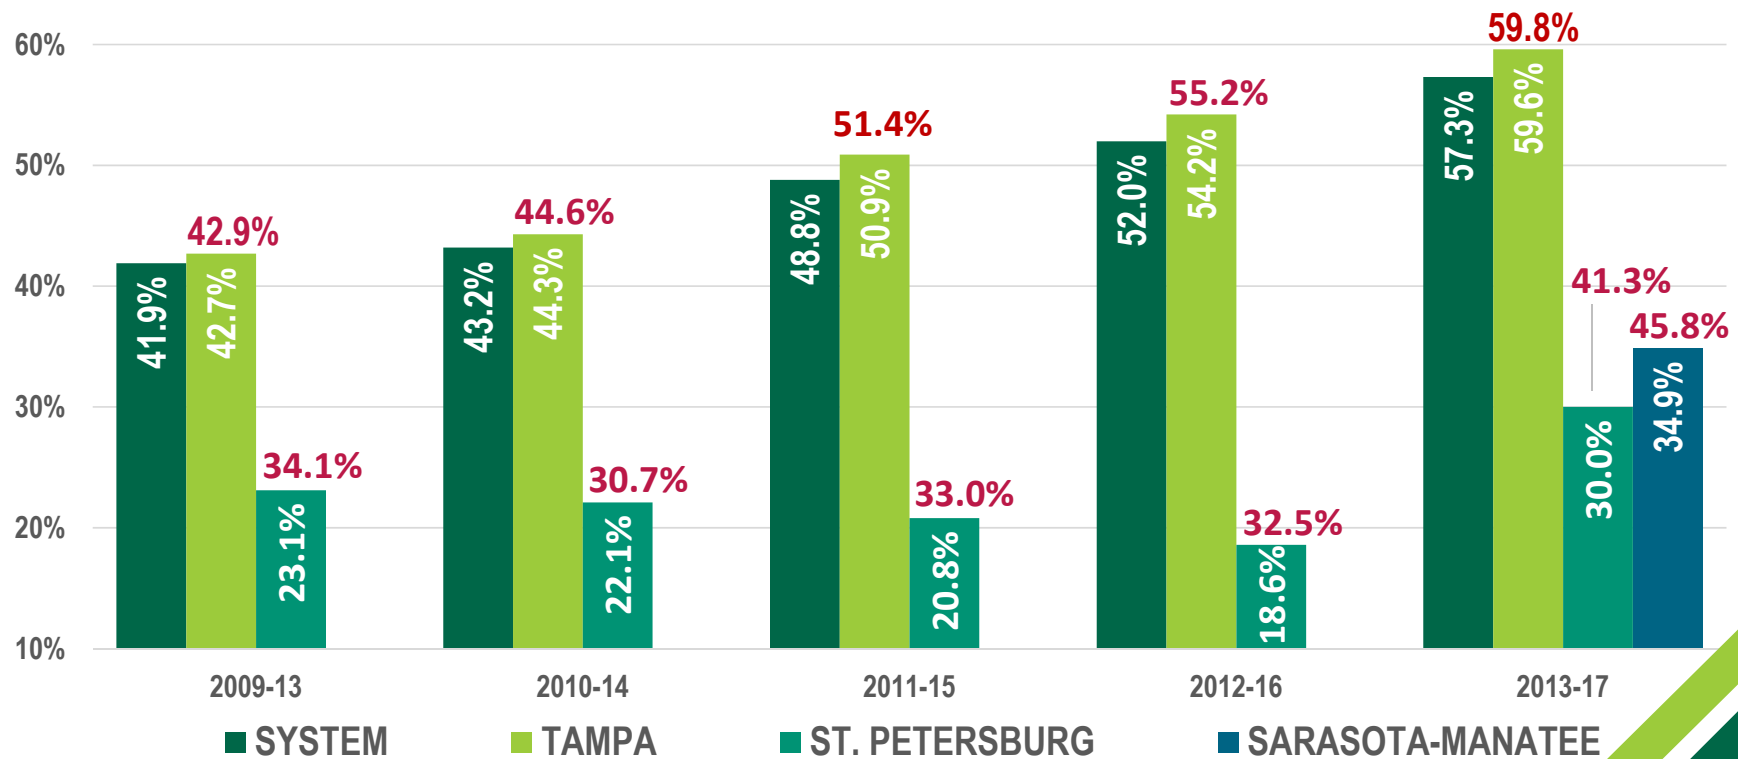

■ SYSTEM ■ TAMPA ■ ST. PETERSBURG ■ SARASOTA-MANATEE

■ SWIRL

Four-Year Graduation Rate

By Campus, With Swirl

Four-Year Graduation Rate: Race & Ethnicity

By Campus, 2013-2017 Cohort

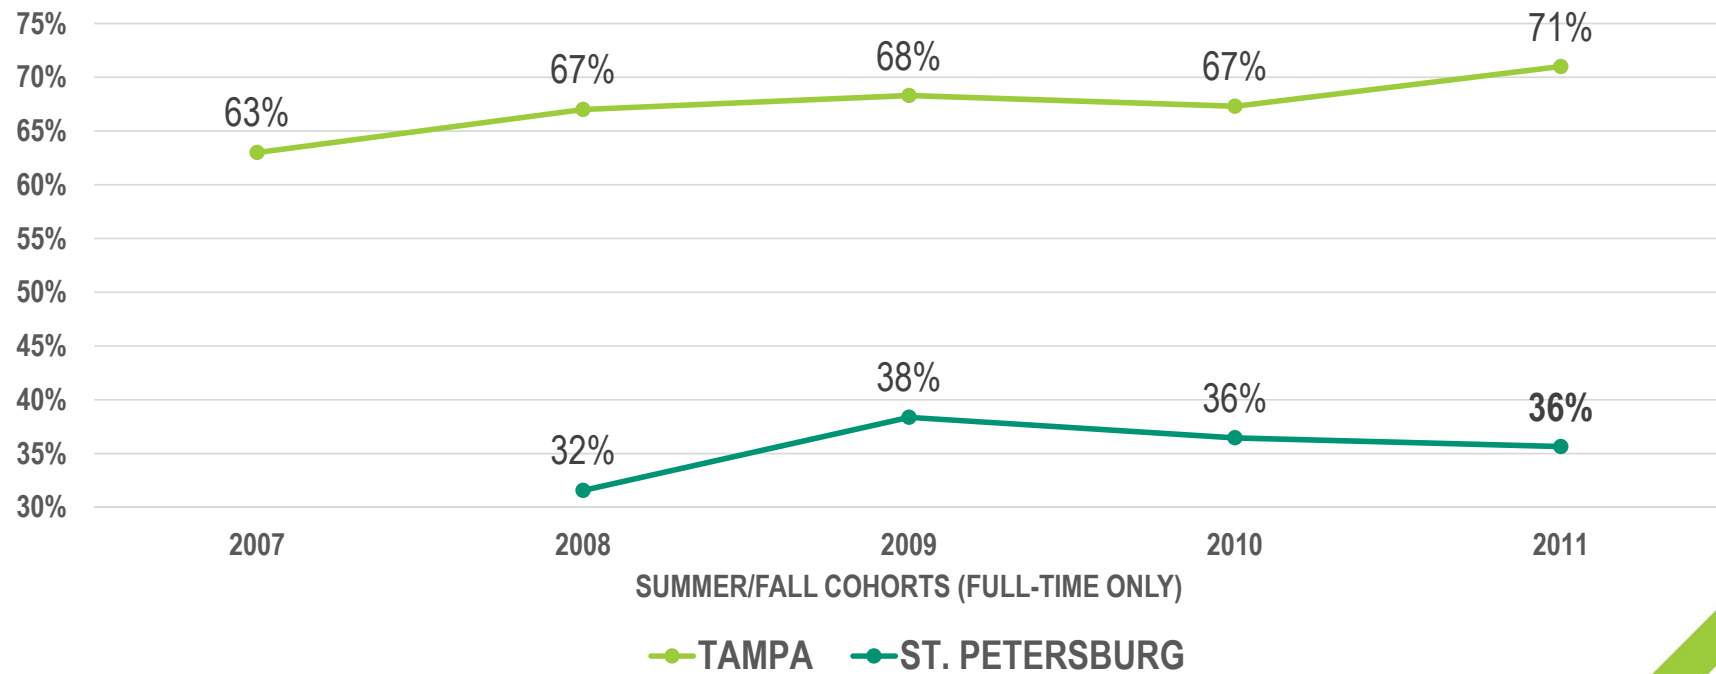

Four-Year Graduation Rate: Pell vs. Non-Pell

By Campus, 2013-2017 Cohort

Six-Year Graduation Rate

By Campus

Six-Year Graduation Rate: Race & Ethnicity

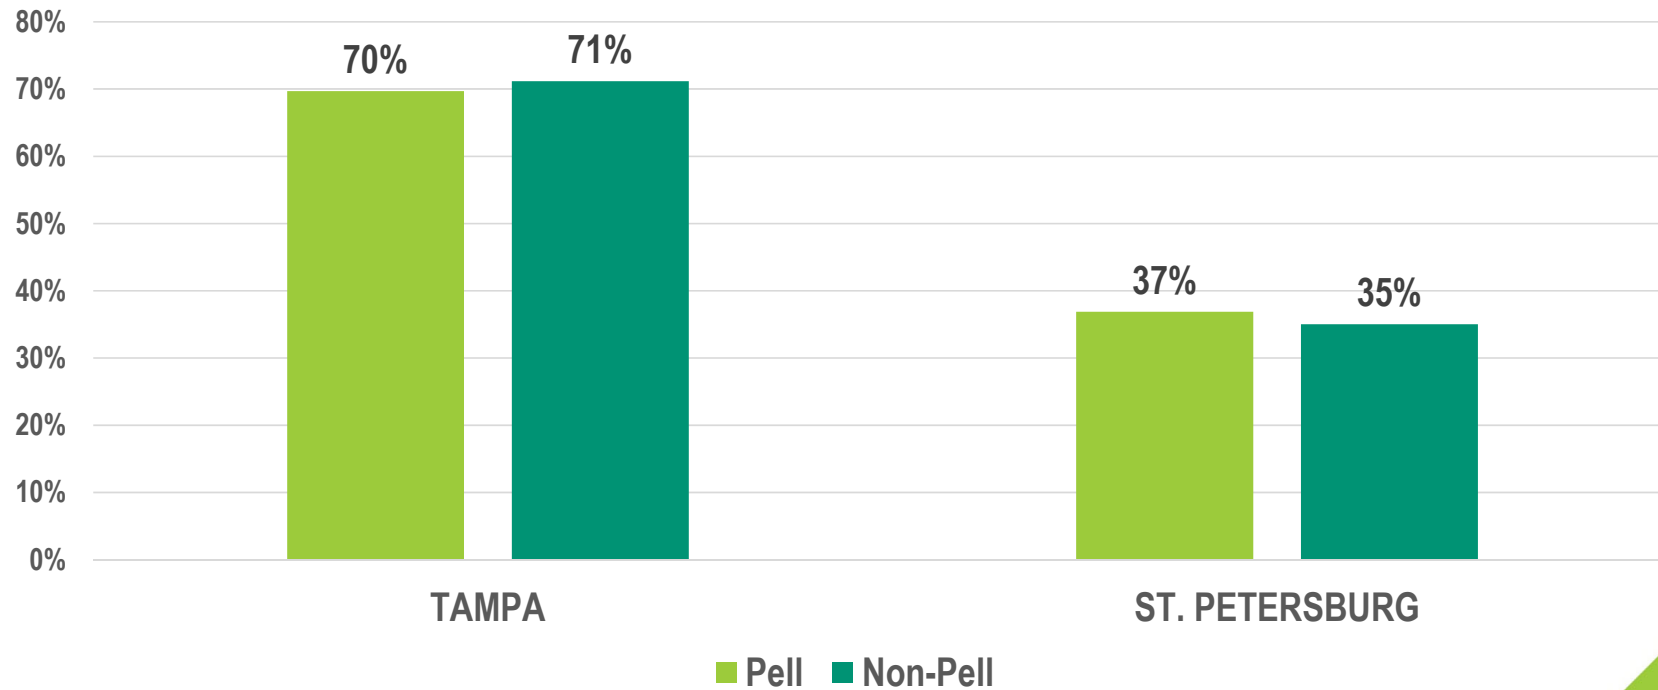

By Campus, 2011-2017 Cohort

Note: Other category includes Native American, Multi-Race, Non-Resident Aliens, Hawaiian Native/Pacific Islander, Not-Reported

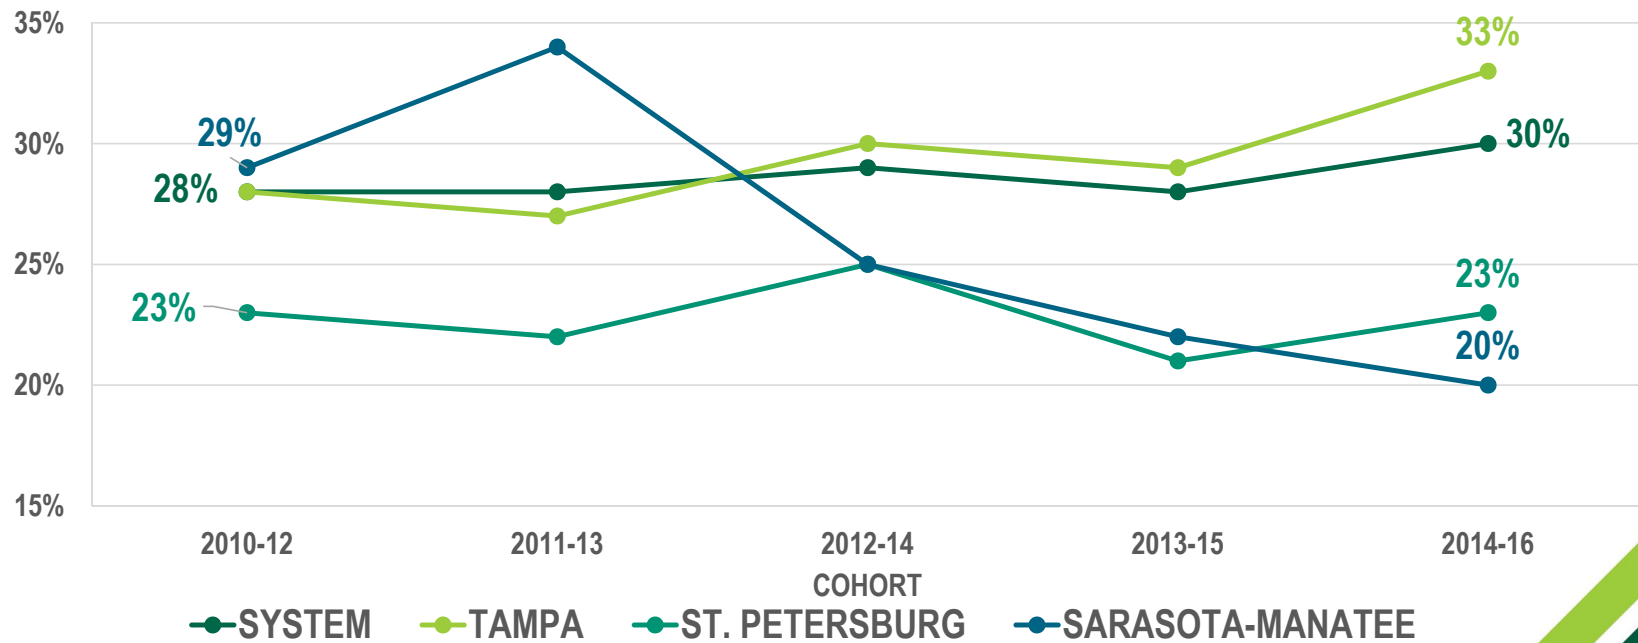

Six-Year Graduation Rate: Pell vs. Non-Pell

By Campus, 2011-2017 Cohort

Two-Year Graduation Rates: AA Transfers

From Florida College System

Four-Year Graduation Rates: AA Transfers

From Florida College System

Student Success Movement: Tampa

- Student Success Task Force Report (April 2010)
 - Institutionalize Student Success
 - Integrate student success into campus culture
 - Build institutional research capacity
- Student Success is **everyone's responsibility.**

Implemented policies, programs and practices, including:

- SMART Lab
- Living Learning Communities
- Extended Library Hours
- Career Services
- Peer Financial Consulting
- Tutoring & Writing Services
- Course Re-design
- Degree Tracking Software
- Academic Advocates
- Informational Campaigns

We believe
ALL students **CAN** and
WILL SUCCEED if given
the opportunity to do so.

Dr. Paul Dosal

Vice President – Student Affairs & Student Success

Campus Persistence Committees

- Formed in: Tampa, Jan. 2016; USFSM, spring 2017; USFSP, 2017
- Cross functional teams that identifies and supports **all at-risk students** through timely and appropriate interventions
 - Academic Advocates (case managers)
 - Housing & Residential Education
 - Academic Foundations Instructors
 - Orientation Team Leaders
 - Career Counselors
 - Financial Aid
 - Academic Advisors
 - Cashier's Office
 - Library
 - New Student Connections
- “Triage” lists of at-risk students
- Coordinates appropriate interventions

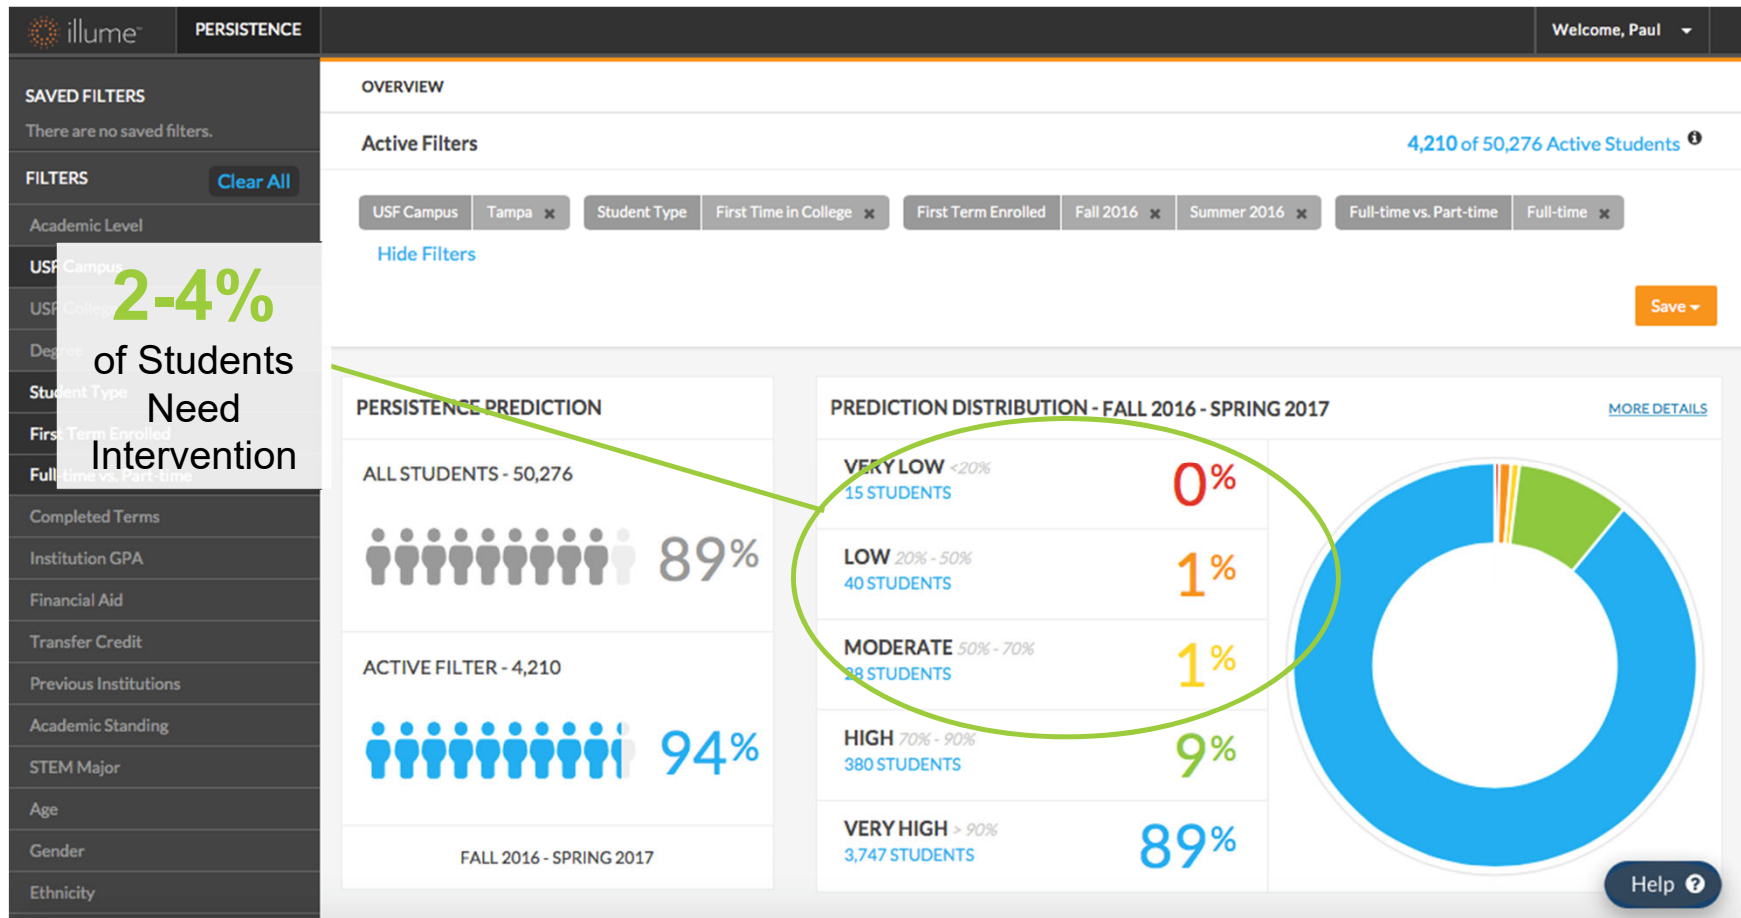

Actionable Data Insights

- Miller/Herreid Persistence Model pre-matriculation model identifies at risk FTIC students
- Civitas Predictive analytics platform sorts students by risk factors using “live” data feed from Banner and Canvas

Civitas Illume Predictive Analytics

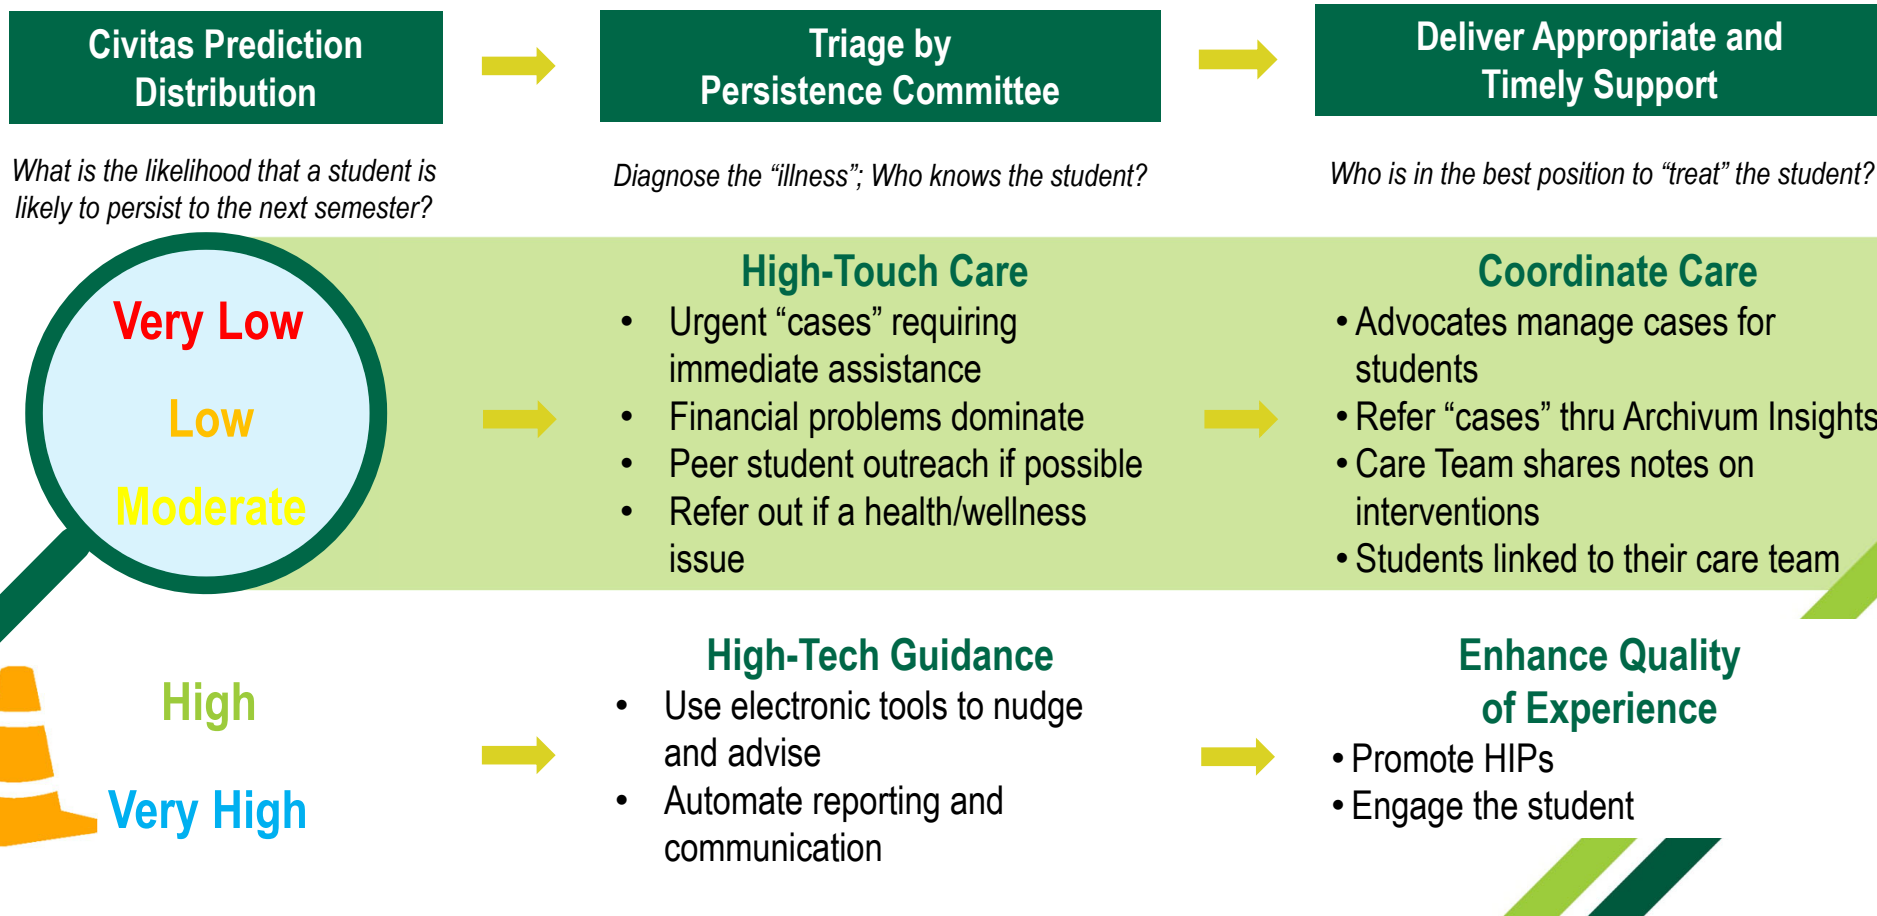

Right Support, Right Student, Right Time

- Identify at-risk students before problems occur
- Refer students to the appropriate expert
- Transform passive support services into active outreach
- Share data and reports to create 360 view of students

Emerging Case Management Approach

Elements in Place for System-Wide Student Success Movement

- Coordinated enrollment planning & management
- Financial Aid managed centrally
- Persistence Committees in place at each institution
- System-wide predictive analytics platform
- Archivum Insights used for case management
- System-wide Course Scheduler
- Four-Year Graduation Rate plan

Consolidation of Student Success

- Formation of new Student Success Committee
- Persistence Committees at Each Campus
- Implementation of coordinated Retention and Completion Efforts
 - Application of predictive models on all campus
 - Standardization of practices
 - Use of mini-grants to promote retention and graduation
 - Extension of Finish in Four initiative

Discussion
