

### **Electrical Engineering Professor Ravi Sankar Awarded Fulbright**

Electrical Engineering Professor Ravi Sankar has been selected to receive a Fulbright award to Brazil for 2015-2016.

This is a research award whose primary purpose is to conduct United States-Brazil cooperative research with the *Universidade de Sao Paulo (USP) at São Carlos School of Engineering*, the largest and highest ranked university in Brazil. The collaborative research focuses particularly on the use of sensor networks and signal processing to improve healthcare that is mutually beneficial to both the countries.

Another mission of this *Fulbright-Brazil Scientific Mobility Program* is to foster bilateral cooperation between USF and the host institutions, including the University of Sao Paulo and University of Campinas, two of the largest and two of the top-ranked institutions in Brazil.
