

Craig Lusk (left) and Ahmad Alqasimi (right)

Mechanical engineering doctoral candidate Ahmad Alqasimi and Associate Professor Craig Lusk received the Best Paper Award by the American Society of Mechanical Engineering (ASME) Design Engineering Division's Mechanisms and Robotics Committee at the 2015 International Design Engineering and Technical Conferences in Boston. The award was competitive. Of the 270 papers submitted to the conference only 240 were accepted, and just one was chosen for the best paper award. The paper was titled "Shape-Morphing Space Frame (SMSF) using Bistable Elements."
